NOTE: When a Mazda 6 Spoiler is installed, the installer must take care when pressing the spoiler down to adhere the tape as shown on page 6 step 6.

# GENUINE REAR SPOILER

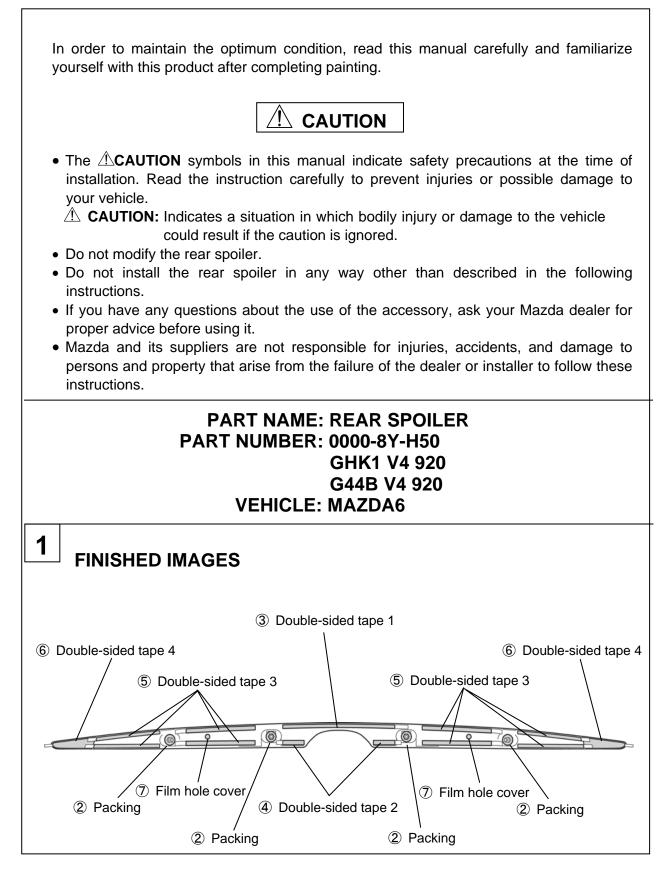

### **IMPORTANT POINTS IN PAINTING**

After baking, do not touch the painted product until it has cooled down completely.

# GENUINE REAR SPOILER

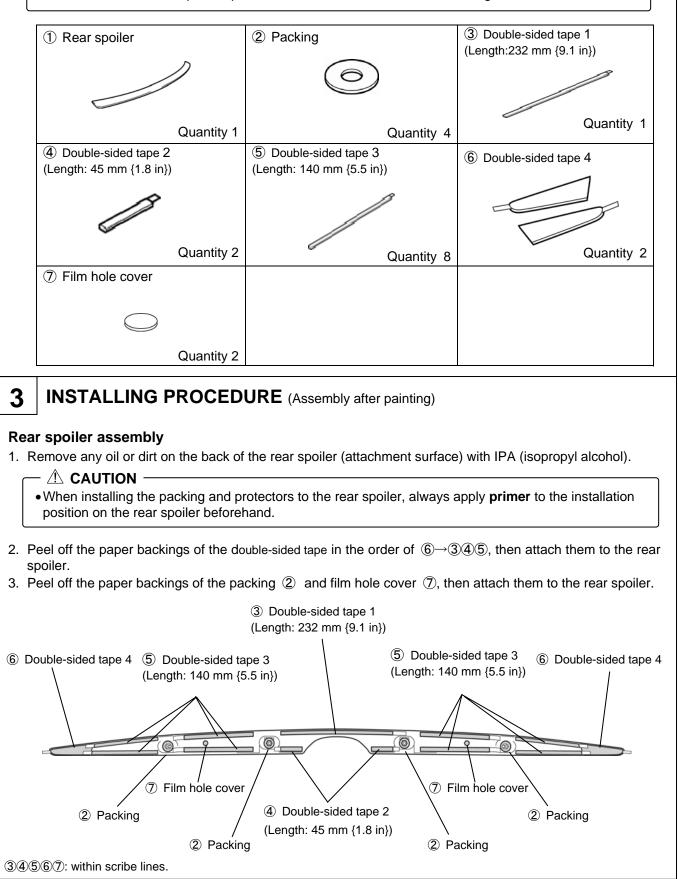

## **COMPONENT PARTS INSTALLATION MANUAL**

#### 2 **REQUIRED PARTS** (Check the following parts prior to installation)

#### 

- Check the chart shown below and make sure that no parts are missing.
- Make sure all the component parts are free from dirt, scratches, or damages.

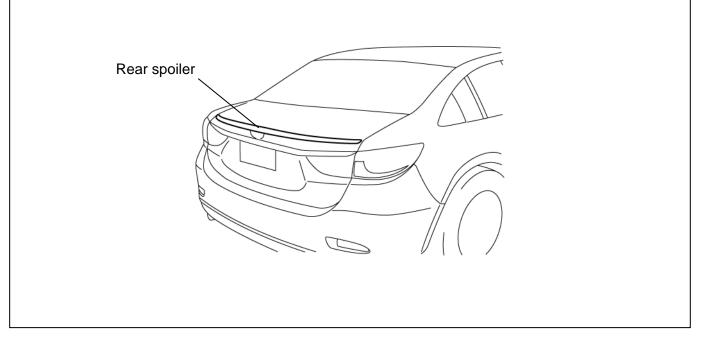

# **GENUINE REAR SPOILER**

## **INSTALLATION AND USER'S INSTRUCTIONS**

Thank you for purchasing a genuine Mazda accessory. Before removal and installation, be sure to thoroughly read these instructions. Please read the contents of this booklet in order to properly install and use the rear spoiler. Your safety depends on it. Keep these instructions with your vehicle records for future reference. • There are several **AWARNING** and **ACAUTION** sections in this booklet concerning safety when installing or removing the rear spoiler. Always read and follow them in order to prevent injuries, accidents, and possible damage to the vehicle.  $\triangle$  WARNING: Indicates a situation in which serious injury or death could result if the warning is ignored. riangle CAUTION: Indicates a situation in which bodily injury or damage to the vehicle could result if the caution is ignored. • For areas indicating the tightening torque in this instruction manual, tighten to the specified torque using a torque wrench. For areas in which the tightening torque is indicated inside parentheses (), the tightening torque is indicated as a reference value, however tightening using a torque wrench is not necessary • Do not modify the rear spoiler. • Do not install the rear spoiler in any way other than described in the following instructions. • If in any doubt, please ask your Mazda dealer to install the accessory in order to prevent errors in installation. • If you have any questions about the use of the accessory, ask your Mazda dealer for proper advice before using it. · Mazda and its suppliers are not responsible for injuries, accidents, and damage to persons and property that arise from the failure of the dealer or installer to follow these instructions. • To ensure safety and reliability of the work, installation, removal and disposal work must be carried out by an Authorized Mazda Dealership. • Be careful not to lose removed parts, and be sure that they are kept free from scratches, grease or other dirt. PART NAME: REAR SPOILER PART NUMBER: 0000-8Y-H50 GHK1 V4 920 G44B V4 920 **VEHICLE: MAZDA6** NOTE -To the dealer Please turn over these instructions to the customer after installation. To the customer Keep these instructions after installation. The instructions may be necessary for installing other optional parts or removal of this accessory. · Should the vehicle or this accessory be resold, always leave these instructions with it for the next owner.

## 1. INSTALLATION VIEW

## 2. PARTS

• Before installation, verify that the kit includes all the following parts and that they are free of dirt, scratches, or damage.

Part	Part name	Qty	Part	Part name	Qty	Part	Part name	Qty
	Rear spoiler	1		Nut	4	400 WA	Template	1
	Installation Instructions	1						

## 3. BEFORE INSTALLATION

### REQUIRED TOOLS

☆ Flathead screwdriver ☆ Socket wrench (10 mm) ☆ Fastener remover ☆ Torque wrench ☆ measure ☆ Electric drill (3 mm, 6 mm, 10 mm drill bits) ☆ Round file ☆ Punch ☆ Utility knife ☆ Scissors ☆ Tape ☆ Soft, clean cloth ☆ IPA (isopropyl alcohol) ☆ white gasoline ☆ Touch-up paint (Genuine product)

## A WARNING

Park the vehicle on a flat, level surface, set the selector lever to P (AT vehicles) or the shift lever to 1st or R (MT vehicles), apply the parking brake and block the wheels so that the vehicle does not move during installation.

### 

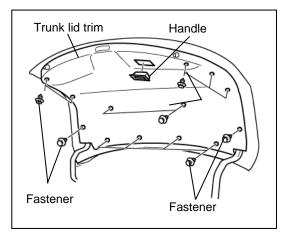

Be sure to cover the vehicle body with protectors or mats to prevent stains, scratches and damage when removing/installing the vehicle parts	Using improper tools may cause damage and or broken parts. Use the correct tool for the job.	Wrap protective tape around screwdrivers and fastener remover tools to prevent scratching the vehicle.	Put the removed parts and the parts in the kit on the protective sheet to prevent scratches.
			8

#### Advice

Refer to the Workshop Manual for removal and installation of vehicle parts. Not following the procedures for removal/installation in the Workshop Manual could result in an accident or vehicle malfunction.

### 4. VEHICLE PART REMOVAL

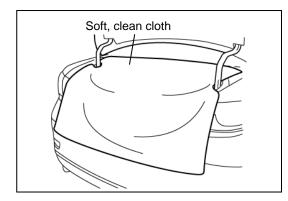

Trunk lid trim removal

- 1. Remove the fasteners (13).
- 2. Pull the handle outward and remove the trunk lid trim.

### **5. REAR SPOILER INSTALLATION**

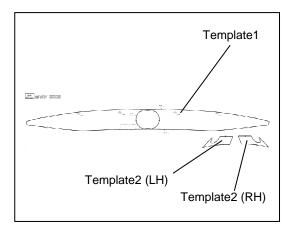

#### Rear spoiler installation preparation

• Cover the rear spoiler with a clean cloth to prevent scratches or other damage.

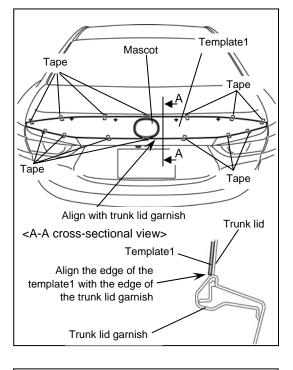

#### Vehicle protection

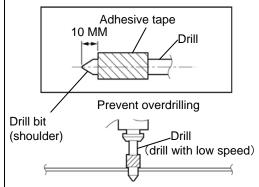

1. When drilling the trunk lid, cover the vehicle with a soft, clean cloth to prevent shavings from penetrating the trunk.

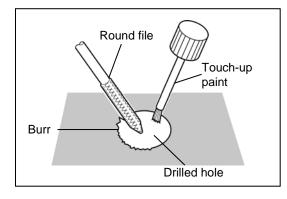

#### Body hole drilling

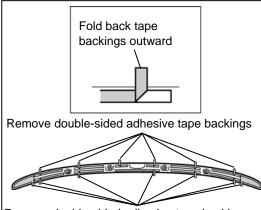

1. Cut out the templates1, 2 with scissors along the cut lines.

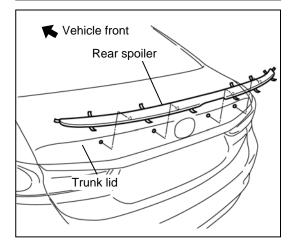

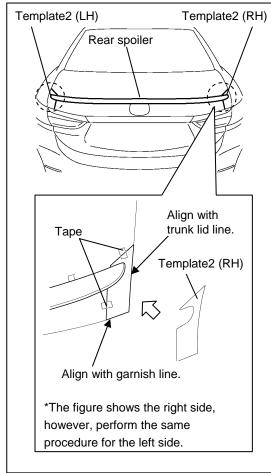

- 2. Align template 1 with the mascot and trunk lid garnish, and secure the template with tape.
  - Make sure the template is not twisted or detached when affixing it to the body.
  - Make sure the template is in the center of the trunk lid when affixing it to the body.
- 3. Tap drill hole marks with a punch in the crosshair marks on the rear spoiler installation templates (4 locations).
  - Before marking with a punch, verify again that the marked hole positions of the template is in the center of the trunk lid.
  - Do not punch the trunk lid, otherwise it may be deformed.
- 4. Peel off the template1.
- 5. Wrap the drill bit with duct tape as shown in the figure.
- 6. Set the drill speed to low.
  - Always use a drill with a rotation speed adjustment, otherwise the trunk lid may deform.
  - Be careful when handling drills and other sharp objects.
  - To prevent scratching and overdrilling, wrap the drill bit with duct tape.
- 7. With the drill bit pointed perpendicular to the trunk lid, drill a hole in the marked position in stages.
  - Drill hole diameter: From 3 mm to 6 mm and then 10 mm diameter (1 location)
- 8. Remove any metal burrs around the drilled hole with a round file.
  - Make sure to remove burrs from the surface so that the surface of the trunk lid is smooth.
- 9. Remove all shavings using an air compressor.
  - Completely remove drill filings from the trunk and cabin, otherwise they may cause abnormal noise.
- 10. Degrease the trunk lid using IPA (isopropyl alcohol).
- 11. Apply touch-up paint.
- 12. Remove the soft cloth for the vehicle.

Remove double-sided adhesive tape backings

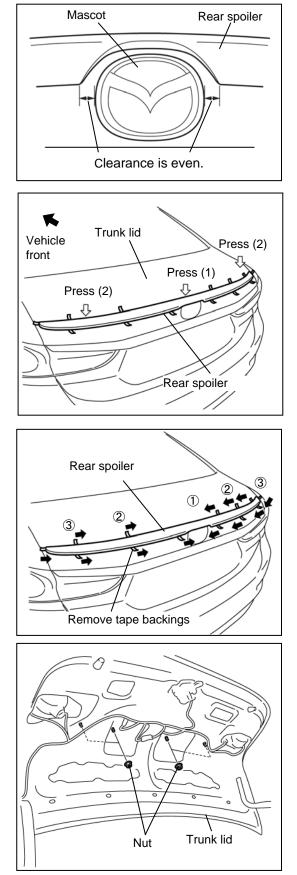

Rear spoiler installation

- 1. Fold the double-sided adhesive tape (13 locations) outward so that they can be removed easily.
  - Do not remove too much of the tape backing.

- 2. Hold both ends of the rear spoiler and align the rear spoiler screw positions with the installation hole (10 mm diameter) of the trunk lid and insert lightly.
  - Do not insert the rear spoiler screw positions 100% down into the installation hole.
    Otherwise, the double-sided adhesive tape on the backside of the rear spoiler will adhere to the trunk lid, and the installation position cannot be adjusted.
- 3. Align template2 with both ends of the trunk lid and rear spoiler, and adjust the height.

- 4. Align the following clearances and height to determine the installation position.
  - Make sure the clearance on the upper part and both sides of the rear spoiler and the mascot is even.
  - Make sure that the outward-folding double-sided adhesive tape (13 locations) does not get stuck on the trunk lid.
- 5. Peel off the template2.
- 6. Press in from the surface of the rear spoiler and install the rear spoiler to the trunk lid.
  - Press the rear spoiler in gently. If it is pressed in with excessive force, the trunk lid will deform making it difficult to install the rear spoiler.

- 7. Remove the double-sided adhesive tape backings from the rear spoiler in the direction of the arrows in the order of 1 to 3, and affix securely.
  - Perform the procedure while lifting up the rear spoiler from the trunk lid slightly so as not to tear the tape backing.
  - Do not remove the rear spoiler once it has been affixed to the accessory to prevent loss of adhesive strength.
- 8. Fully tighten the rear spoiler using the nuts (4).

#### Nut tightening torque: 3.9-6.8 Nm (40-69 kgf/cm, 35-60 in/lbf)

- Tighten the nuts securely. Make sure to tighten to the specified torque. If tightened outside the specified torque, the rear spoiler could be damaged or fall off.
- 9. After installing the rear spoiler, install the trunk lid trim in the reverse order of removal.

### 6. To the customer

Heed the following cautions when handling (maintenance) the rear spoiler.

- If gasoline, oil, engine coolant, or battery fluid adheres to the hard plastic parts, it will cause discoloration, stains, or damage. Wipe off immediately with a soft cloth.
- Depending on the type of high pressure car washer used, the water for washing may be high temperature and/or under high pressure. Be careful when using pressurized water from a car washer nozzle. If the nozzle is too close or water pressure is applied for long periods, it may cause deformation or damage to the hard plastic parts.
- Do not use car wax containing compound (polishing powder). Otherwise, the hard plastic parts could be damaged.
- Do not use electric or air tools to apply wax or compound (polishing powder). Otherwise, friction heat will be generated causing deformation or damage to the hard plastic parts.

Check

INSTALLATION INSPECTION SHEET		Rear spoiler	
	MAZDA6	0000-8Y-H50 GHK1 V4 920	
		G44B V4 920	

Perform the following inspections

#### 1. Inspection items after installation

• Verify the fitting between the vehicle part and the installed part, and inspect for damage or dirt.

#### 2. Vehicle parts reinstallation

Inspected part	Inspection item	Inspection	Check
Trunk trim	Rattling	Inspect the trim for looseness or drop off.	

#### 3. Installation of accessory, operation check

Inspected part Inspection item		Inspection	Check
Rear spoiler installation	Looseness	Inspect the installation area for looseness.
