iPod adapter
MODEL
MZ607411EX (V-900IP-U)
INSTALLATION MANUAL

WARNING

- Read these installation instructions thoroughly prior to starting installation work.
- Wiring should be performed after disconnecting the negative terminal of the battery. Otherwise, electric shock or physical injury may occer.
- This equipment is only for vehicles equipped with 12V DC negative ground systems. Do not install it in any vehicle equipped with a 24V system, such as a large truck or diesel powered automobile equipped for cold regions. Such usage causes danger of fire.
- All cords should be kept together to avoid interference with driving operations. It is dangerous if they wind around the steering column, gear shift lever or brake pedal.
- If any cord comes in contact with a burr (sharp projection formed during the manufacture of parts) or any other sharp object, protect the cord by covering with tape to avoid damage. Any damage to the covering may be a cause of fire or electric shock.
- Never install in a manner that blocks front visibility, interferes with normal driving operations of the steering wheel, gear shift lever or brake pedal or creates a danger to any passenger in the case of a sudden stop. It may be the cause of a traffic accident or injury.
- Be sure to use all the accessory components as instructed and attach them securely. Never use a part other than that specified. Use of such a part may cause danger of damage to the internal components of the unit or loosening or detachment of components.
- When attaching the ground to bolts or nuts attached to the vehicle, never use those of any safety related component such as the steering, brake system or fuel tank. Such usage may cause accidents.
- After completion of the wiring and installation work, ensure that all electric components, such as the brake system, lights, horn and turn signal lights operate normally as before the installation. If operation is not normal, find the cause by checking the wiring to make sure it is proper. Use with unknown problems may be the cause of fire, electric shock and accidents.
- Never disassemble or modify the unit. It may be the cause of accident, fire or electric shock.
- If any abnormality, such as penetration by any foreign material, splashing, smoking or if normal odors occur, stop use immediately and contact the dealer. Continuing use may be the cause of accidents, fire or electric shock.

☐ General main points regarding installation

1 Setting of adapter main unit

The iPod adapter must be set ahead of time according to the system to which it will be connected. Set the adapter main unit referring to the initial settings on the back of this sheet.

2 Mounting adapter main unit

Top surface
Label
(1) Adapter main unit
(2)Double-coated tape (2 pcs.)
Bottom surface
Mounting surface
mb303

Stick the (2) double-coated tape on the (1) adapter main unit and stick them to the mounting surface.
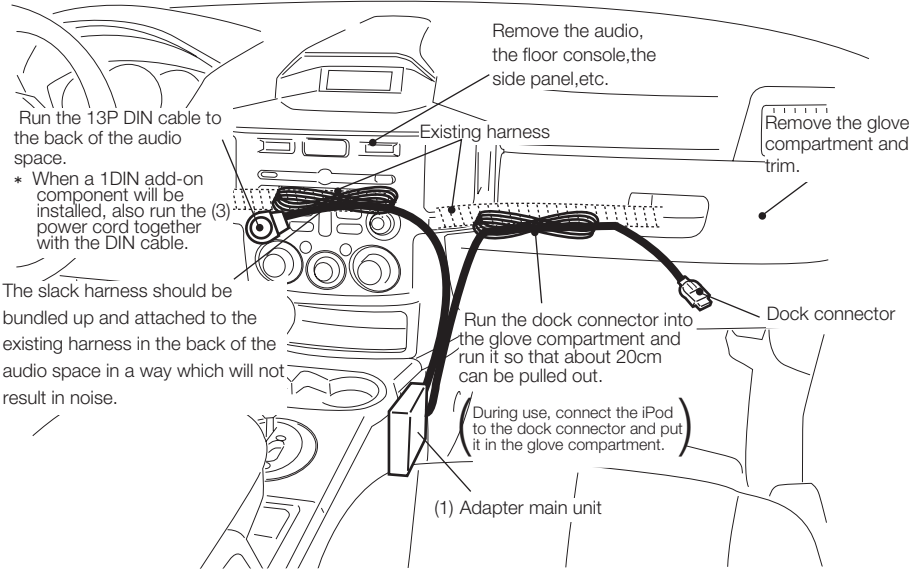

Check ☐

Stick the (2) double-coated tape to the bottom surface of the (1) adapter main unit (the surface without the label). If the (2) double-coated tape will be stuck on the top surface, position the tapes so that they do not cover the label.

Caution
★ Wipe the area to which the tapes will be stuck on clean and stick the tapes on securely.

3 Positioning the various cords

Remove the audio, the floor console,the side panel,etc.

Run the 13P DIN cable to the back of the audio space.
★ When a 1DIN add-on component will be installed, also run the (3) power cord together with the DIN cable.

Existing harness

Remove the glove compartment and trim.

The slack harness should be bundled up and attached to the existing harness in the back of the audio space in a way which will not result in noise.

Run the dock connector into the glove compartment and run it so that about 20cm can be pulled out.

Dock connector

During use, connect the iPod to the dock connector and put it in the glove compartment.

(1) Adapter main unit

Check ☐

4 About connections

The main points of connections will be different for each system. Please refer to "Main Points Regarding Connection" on the back of this sheet.

Check ☐

5 Operation check

1)Connect the iPod.
2)Operate the head unit to select the iPod.
3)Operate the head unit and check that the iPod sound is being out-put.

★ If an iPod is not available, perform the following simple check.

1)Operate the head unit and select the iPod.
2)Check that the audio display shows the eject status display ("EJ", etc.)
If operation is not normal, recheck all connections and recheck the settings of the adapter main unit.

Check ☐

INTRODUCTION

This product is an adapter for controlling iPod. When the head unit has the CD changer control function, it regards an iPod as a CD changer by connecting to the iPod.
The basic operations are described below. Depending on the function of the head unit to be connected, the basic operations may differ slightly.

CD changer operation functions	iPod operation
Disc selection	Selects Playlist/Album.
Track selection	Selects track (song).
FAST FORWORD / FAST REVERSE	Fast forward/fast reverse of track (song)
REPEAT	Repeats playing of the song in play.
RANDOM	Shuffles and plays songs in iPod.
SCAN	Scans the start of the first song of every album. (10-second playing each in order)

* Bassically follows some function as CD changer.
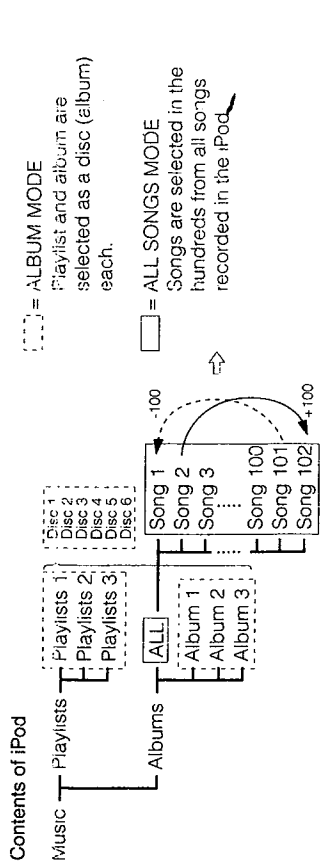

INITIAL SETTINGS

Depending on the head unit that will be connected, it may be necessary to change the settings of this adapter. The setting switches are on the side of the adapter. Set the switches as shown below before installing the unit. At the time of shipment from the factory, all switches are set to ON.

Song 101
Song 102 ~100

┌ ┐ = ALBUM MODE
Playlist and album are selected as a disc (album) each.

□ = ALL SONGS MODE
Songs are selected in the hundreds from all songs recorded in the iPod.
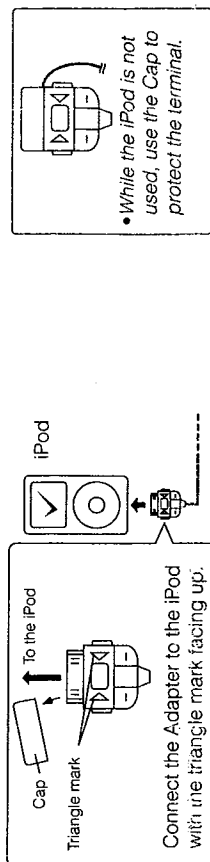

The adapter recognizes folder of songs in "Play list" as disc in order indicated on iPod screen. Folders appear on iPod by iTunes setting e.g. "Recent Play" "Top25" are recognized as one disc as well. After the last folder of the play list, the first folders in "Album" will be appeared as disc on head unit in alphabetical then numerical order. (Order that indicated on iPod screen)

HOW TO CONNECT

Connection of iPod

Connect the Dock connector to the iPod.
The power of the iPod is turned on, and a check mark "✓" is indicated on the screen of the iPod.

Cap
To the iPod
iPod

Triangle mark

Connect the Adapter to the iPod with the triangle mark facing up.

Note:
•When an iPod is connected to this adapter, operation is disabled from the iPod side.
•When ACC is on, or the engine is started, the iPod is charged.

•While the iPod is not used, use the Cap to protect the terminal.

BEFORE USE

iPod and iTunes are trademark of Apple Computer, Inc., registered in the U.S.A. and other countries.

Operable iPod

Type	Software version (The described version or later are supported.)
iPod with dock connector	iPod Software 2.3
iPod with click wheel	iPod Software 3.0.2
iPod photo, iPod with color display	iPod Software 1.1
iPod with video	iPod Software 1.0
iPod mini	iPod mini Software 1.3
iPod nano	iPod nano Software 1.0

When the version of the software is older than indication above, it needs to be upgrade.
To check the version of the software, press MENU of the iPod to display Settings, About, and then Version.
The latest software of iPod is able to be downloaded from the web site of Apple Computer.

* The video files of "iPod with video" cannot be played by this product.

IMPORTANT ALERT MESSAGES

⚠ CAUTION

•Store the iPod in a place where it will not fall or be shocked such as the glove box. If the iPod falls where it may slide under the brake pedal or accelerator pedal, driving operation may be impaired, and dangerous.
•Do not leave the iPod where it will be subjected to direct sunlight or high temperatures. It may cause the iPod to fall.
•Do not use the product if an error occurs. If foreign matter or water gets into the product or if it smokes or gives off a strange smell, stop using it, and contact your dealer. If you continue to use the product, it may cause electric shock or fire.

⚠ PRECAUTION

•Before connecting the iPod to this product, disconnect all accessories such as headphone. If the iPod is connected to this product with any accessory connected, it may not work properly.
•If the iPod data is lost by connecting this product, the lost data will be not compensated.
•Do not connect this product to an iPod with EQ function turned on. This may cause the sound to be distorted.
•When the repeat and random functions of this product are set after iPod is connected, the setting of the iPod is also changed. The setting changed is effective after the iPod is disconnected.
•For handling iPod, refer to the instruction manual of iPod.

iPod adapter

MODEL

MZ607411EX (V-900IP-U) Instruction Manual-Supplement

1.Operable iPod (Current as of May 2008)

Type	Software Version (The described version or later are supported.)	Others
iPod 3rd	2.3~	With dock connector
iPod 4th	3.0.2~	With click wheel

· Normal operation may not be possible in some cases due to software version or contents.

· The video files cannot be played by this product.

· Normal operation may not be possible with iPod with video podcasts stored in memory.

*iPhone

When this unit is connected to an iPhone, a message about switching to Airplane mode will be shown in the iPhone display.

Even if [No] is selected at that time, operation is still possible; however, our company is not responsible for phone or e-mail function losses due to connection with this unit in such cases.

2.Regarding connection with navigation unit

This unit cannot be connected with a navigation unit. When connecting to an MDS system, be sure to connect to the audio (Head unit) component.
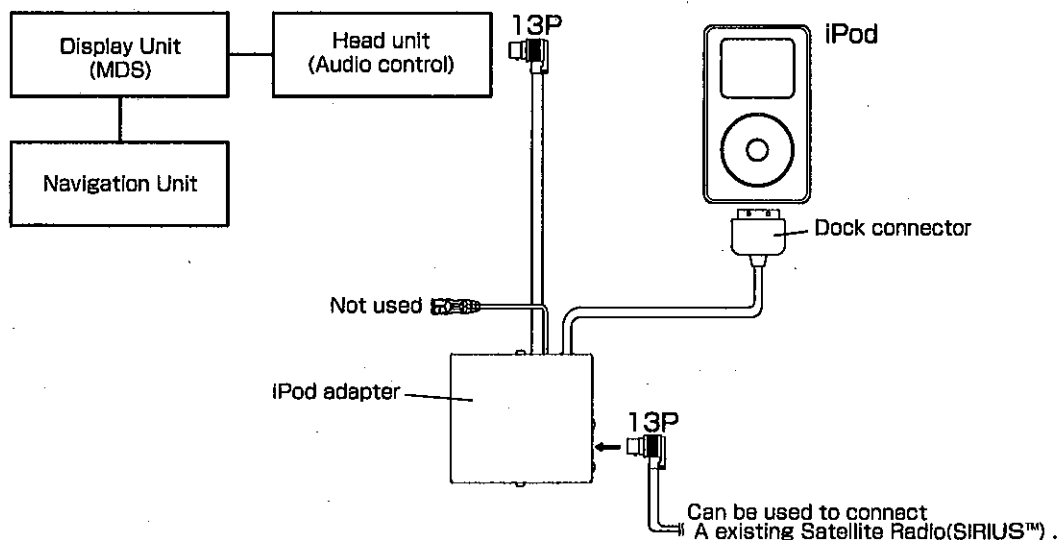

3.Initial settings (Current as of May 2008)

Depending on the head unit that will be connected,
it may be necessary to change the settings of this adapter.
The setting switches are on the side of the adapter.
Set the switches as shown below before installing the unit.
At the time of shipment from the factory, all switches are set to ON.

Instruction manual

Thank you for purchasing this MITSUBISHI product.
* Please read this manual completely before operating this product.
* After reading this manual, be sure to keep it in a handy place.
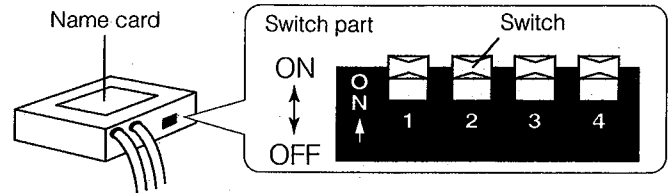

▲ MITSUBISHI MOTORS CORPORATION

INTRODUCTION

This product is an adapter for controlling iPod. When the head unit has the CD changer control function, It regards an iPod as a CD changer by connecting to the iPod.
The basic operations are described below. Depending on the function of the head unit to be connected, the basic operations may differ slightly.

CD changer operation functions	iPod operation
Disc selection	Selects Playlist/Album.
Track selection	Selects track (song).
FAST FORWORD / FAST REVERSE	Fast forward/fast reverse of track (song)
REPEAT	Repeats playing of the song in play.
RANDOM	Shuffles and plays songs in iPod.
SCAN	Scans the start of the first song of every album. (10-second playing each in order)

* Bassically follows some function as CD changer.

INITIAL SETTINGS

Depending on the head unit that will be connected, it may be necessary to change the settings of this adapter. The setting switches are on the side of the adapter. Set the switches as shown below before installing the unit. At the time of shipment from the factory, all switches are set to ON.

Setting information	Details (The head unit code is indicated on top or bottom surface.)	Switch settings			
		1	2	3	4
Setting according to connected optional equipment	Head unit code. •MN141490 (MONTERO, LANCER, LANCER SPORTBACK) •MN141494 (ECLIPSE, ECLIPSE SPYDER(~'05)) •MN141488 (MONTERO, MONTERO SPORT, OUTLANDER) •MR587385 (MONTERO SPORT, OUTLANDER) •MN141496 (GALANT) •MR306775 (GALANT) •8701A011 (ECLIPSE('06~), ECLIPSE SPYDER('07~)) •8701A032 (OUTLANDER) •8701A045 (ENDEAVOR, GALANT, ECLIPSE('06~)) •MN141259 (ENDEAVOR)	ON	ON	—	—

BEFORE USE

iPod and iTunes are trademark of Apple Computer, Inc., registered in the U.S.A. and other countries.

Operable iPod

Type	Software version (The described version or later are supported.)
iPod with dock connector	iPod Software 2.3
iPod with click wheel	iPod Software 3.0.2
iPod photo, iPod with color display	iPod Software 1.1
iPod with video	iPod Software 1.0
iPod mini	iPod mini Software 1.3
iPod nano	iPod nano Software 1.0

When the version of the software is older than indication above, it needs to be upgrade.
To check the version of the software, press MENU of the iPod to display Settings, About, and then Version.
The latest software of iPod is able to be downloaded from the web site of Apple Computer.

* The video files of "iPod with video" cannot be played by this product.

# IMPORTANT ALERT MESSAGES

⚠ CAUTION

- Store the iPod in a place where it will not fall or be shocked such as the glove box. If the iPod falls where it may slide under the brake pedal or accelerator pedal, driving operation may be impaired, and dangerous.
- Do not leave the iPod where it will be subjected to direct sunlight or high temperatures. It may cause the iPod to fail.
- Do not use the product if an error occurs. If foreign matter or water gets into the product or if it smokes or gives off a strange smell, stop using it, and contact your dealer. If you continue to use the product, it may cause electric shock or fire.

⚠ PRECAUTION

- Before connecting the iPod to this product, disconnect all accessories such as headphone. If the iPod is connected to this product with any accessory connected, it may not work properly.
- If the iPod data is lost by connecting this product, the lost data will be not compensated.
- Do not connect this product to an iPod with EQ function turned on. This may cause the sound to be distorted.
- When the repeat and random functions of this product are set after iPod is connected, the setting of the iPod is also changed. The setting changed is effective after the iPod is disconnected.
- For handling iPod, refer to the instruction manual of iPod.

Contents of iPod

Music — Playlists — Playlists 1 / Playlists 2 / Playlists 3

Disc 1 / Disc 2 / Disc 3 / Disc 4 / Disc 5 / Disc 6

Albums — ALL / Album 1 / Album 2 / Album 3

Song 1 ← -100
Song 2
Song 3
⋮
Song 100
Song 101
Song 102 ← +100

⬚ = ALBUM MODE
Playlist and album are selected as a disc (album) each.

▭ = ALL SONGS MODE
Songs are selected in the hundreds from all songs recorded in the iPod.
*Playing order of "ALL SONGS MODE" is differ by iPod setting.
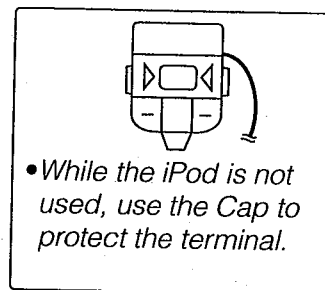

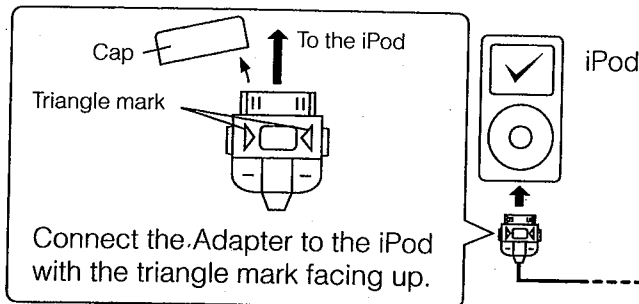

The adapter recognizes folder of songs in "Play list" as disc in order indicated on iPod screen. Folders appear on iPod by iTunes setting e.g. "Recent Play" "Top25" are recognized as one disc as well. After the last folder of the play list, the first folders in "Album" will be appeared as disc on head unit in alphabetical then numerical order. (Order that indicated on iPod screen)

HOW TO CONNECT

Connection of iPod

Connect the Dock connector to the iPod.
The power of the iPod is turned on, and a check mark "✓" is indicated on the screen of the iPod.

Cap — To the iPod
Triangle mark

Connect the Adapter to the iPod with the triangle mark facing up.

✓ iPod
○

•While the iPod is not used, use the Cap to protect the terminal.

**Note:**
•When an iPod is connected to this adapter, operation is disabled from the iPod side.
•When ACC is on, or the engine is started, the iPod is charged.

HOW TO PLAY

This manual describes the product by taking the head unit shown below for example.

PRESET BUTTON Ch.5

PRESET BUTTON Ch.6

SCAN BUTTON

Volume knob

EJECT BUTTON

FM•AM

TUNE TRACK

SCAN

CD

PRT•RDM

CD BUTTON

REPEAT-RANDOM BUTTON

TRACK SELECT(UP/DOWN) BUTTON

This illustration is an operation panel of ENDEAVOR (2004 version above).

Press the CD button of the head unit to select the CD changer mode, so the iPod is selected, and the song starts to play.

Note:
● *About resume play*

This adapter corresponds to resume play of iPod.

Resume play is the function to start from the position where the user had listened last time when iPod is connected to this adapter. In this case, the disc number of the head unit is indicated "1". When an album is selected, or the random or scanning operation is executed, the resume play is canceled, and the first song of the album recorded in the iPod starts to play.

● *About indication on head unit.*

The following restrictions exist by the display ability of the head unit.

  * *The range of the display of the DISC number of the head unit is 0~9.*

   Therefore, the 10th playlist/album is displayed as "0".

   The display since the 11th repeats 1~0. However, all PLAYLIST/ALBUM can be actually selected.

  * *The range of the display of the TRACK number of the head unit is 1~99.*

   Therefore, can not be displayed correctly since the 100th. However, all songs can be actually selected.

Selecting album

Albums may be selected by using PRESET BUTTON Ch.5 and Ch.6.
There are two modes for selection as shown below:
The operation varies by the mode set at initial setting.

● **Album mode**

Press PRESET BUTTON Ch.6 to select the next album, and press PRESET BUTTON Ch.5 to select the previous album. When only one album is recorded, these button are not operable.

● **All songs mode**

Press PRESET BUTTON Ch.6 to track up 100 songs. Press PRESET BUTTON Ch.5 to track down 100 songs.

TROUBLE SHOOTING

If the trouble is not solved even though the countermeasures listed below are taken, in this case, please contact the dealer.

Problem	Cause	Action
Operation is disabled.	•When some equipment is connected between this adapter and head unit, separate power is needed to supply to this adapter. •Connection of the iPod may not be correctly recognized.	•Check the connection. •Reinsert ACC, or reconnect the iPod. If the problem is not solved even after the above operation is executed, check to see if the iPod is a corresponding model as shown in operable iPod.
Operation is enabled, but it makes no sound.	When a headphone is connected to iPod, it may make no sound.	Disconnect the headphone, and then reconnect the iPod.
Sound is distorted.	When the EQ function is set to the iPod, sound may be distorted in some patterns.	Turn off the EQ function built in the iPod.

ERROR DISPLAY MESSAGE

MESSAGE	CAUSE	ACTION
E	Error in communication with head unit or error in power supply	Reinsert ACC, or reconnect the iPod. Check to see if the connector of this adapter is firmly connected. If the problem is not solved even if the checking above is performed, reset and reconnect the iPod.
EJECT or E	iPod is not connected.	Check the connection with the iPod.
NO DISC	No playable song is recorded in the iPod.	Record songs to the iPod.

The displayed message may differ depending on the head unit to be connected.

SPECIFICATIONS

Power section

Power supply voltage	14.4V(10.8~15.6V)
Maximum consumption current	0.8A

Dimensions and mass

Length of cable	iPod to iPod adapter	2m
	iPod adapter to head unit	1m
Dimensions (WxHxD)		86×66×26mm
Mass (weight)		320g

Selecting track

Press TRACK SELECT (UP/DOWN) BUTTON.
•PRESS UP BUTTON to play the previous track.
•PRESS DOWN BUTTON to play the next track.

Press and hold TRACK SELECT (UP/DOWN) BUTTON to fast forward or fast reverse.

Repeat

Press REPEAT-RANDOM BUTTON.

Repeats the song which is presently playing.
